PREFACE

- This project is developed for submission of Bachelor of Computer Application course. This project provides user the facility to book movie tickets in ARC Theater.

- In the making of this Website we used MySQL as backend-end tool, And PHP as front-end tool. MySQL is globally known for being the most secure and reliable database management system.

- As a student of BCA, we get opportunity to develop a Website for our 5th semester project.

- It also includes a dissertation to be submitted by each of the BCA student as a part of the curriculum.

- This project report is submitted as a part of the three years course of BCA

- BCA-V conducted by Bachelor of Computer Application from Saurashtra University, Rajkot.

ACKNOWLEDGEMENT

- It is our pleasure to acknowledge you that we have taken a project on Online Movie Booking System.

- We are thankful to our PROF. Piyush D. Pitroda for giving us full guidance and co-operation in understanding the information system. We also thank them for their unconditional help in making of this project.

- We are also thankful to our family and friends for supporting us in every situation.

- Finally, we want to say thanks to all faculties of NCC (National Computer College) for helping us a lot.

SHIKHALIYA PRATIK

JATIYA DHARMIK

SAURASHTRA UNIVERSITY

The Saurashtra University is one of the most well-known universities.

It was established on 23rdmay, 1968. It was fairly reputed university in India conducting various courses regarding the dream of 21st century. The university in going day by day, this provides the student the courses level from the graduate to PH.D.

Shree Haribhai Trivedi and Shree Dolarbhai Mankad printthe title magazine in 1958 the resolution passed and 16 August, 1960.It was accepted in the 3rd five year plan of Gujarat, which is started in 1961-62. In 1965 December, the rules regarding university got the permission and 23 august, 1966 certain section is implementedby the result of Saurashtra University started.

The Saurashtra University works officially at 23 may, 1967. At the same time 35 colleges and 2 permitted institutions were started Rajkot, Bhavnagar, Amreli, Junagadh, and Surendranagar districts. The total students were about 18000. Then in the same year two college sare permitted and 37 colleges existed.

NATIONAL COMPUTER COLLEGE

Oppo. 4-Oswal Colony, Sundaram Society, Satyam Colony Road, Jamnagar.

Phone no. (0288) 2711338

National Computer College is begun in year 2000. It is affiliated with Saurashtra University.

Two courses are available in National Computer College. They are Bachelor of Computer College (B.C.A), Bachelor of Business Administration (B.B.A).

As and when we surrounded by difficulties and problems, faculties always guide us and solve our problems. Our principal DR. DIPTI DOMADIYA always inspired us to go ahead though in most difficult situations. The authority persons and all the staff members of National Computer College are good care taking and always helped us in any situation. Each and every subject is explained very easily and in detail so that student can understand very easily and in details so that students can understand very easily. The faculties associated with the college are very helpful &co-operative.

Staff of National Computer College

Principal: Dr. Dipti Domadiya

Faculties: Dr. Hasmukh Domadiya

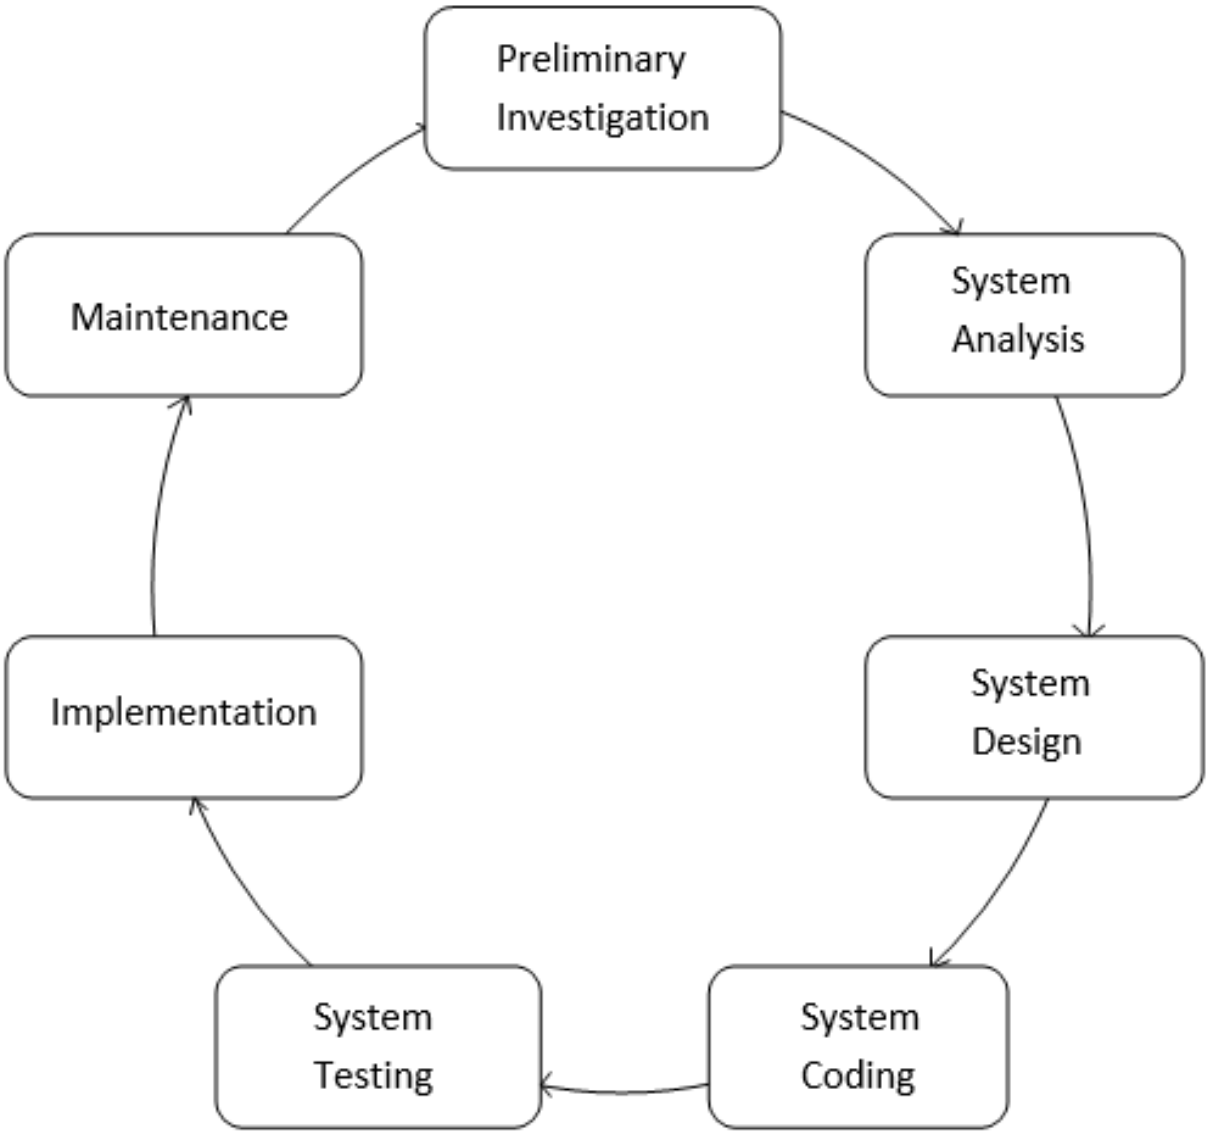
Prof. Chirag Mehta

Prof. Piyush Pitroda

Prof. Rohit Pambhar

Prof. Tushar Sheth

System Development Life Cycle



Software Used

- **Frontend:**
  - PHP
- **Backend:**
  - MySQL
- **OS:**
  - Windows 7 Ultimate

About PHP

- **Introduction to PHP:**
- The full form of PHP is “hypertext pre-processor”. Its original name was “personal home page”.
- Rasmus leadorf software engineer, apache team member is the creator and original driving force behind PHP. The first part of PHP was developed for his personal use in late 1994.
- By the middle of 1997, PHP was being used on approximately 50,000 sites worldwide.

- PHP costs you nothing. It is open source language and doesn’t need to purchase it for development.
- PHP is server-side scripting language, which can be embedded in HTML or used as a stand-alone.
- PHP is an official module of Apache HTTP server.

- PHP is fully cross-platform, meaning it run snativeon several flavors of UNIX, as well as on windows and now on Mac OSX.
- PHP is easy to learn, compared to the others. A lot of ready-made PHP scripts are freely available in market so, you can use them in your project or get some help from them.

About MySQL

- MySQL, the most popular open source SQL database management system, is developed, distributed, and supported by MySQL AB.
- MySQL AB is a commercial company, founded by the MySQL developers. It is a second generation open source company that unites open source values and methodology with a successful business model.
- The MySQL website (http://www.mysql.com/) provides the latest information about MySQL software and MySQL AB.
- The official way to pronounce “MySQL” is “My ESS QueEll” (not “my sequel”), but we don’t mind if you pronounce it as “my sequel” or in some other localized way.
- MySQL is a relational database management system.
- The MySQL RDBMS is very fast, reliable, and easy to use.

About Apache WebServer

- Apache web server is an open source web server creation, deployment and management software. Initially developed by a group of software programmers, it is now maintained by the Apache Software Foundation.
- As of 2013, with over 100 million websites and over 50 percent of the most commonly used applications for website hosting.
- So basically a web server is the software that receives your request to access a webpage. It runs a few security checks on your HTTP request and takes you to the web page. It then serves you the document you requested.
- A very long history of reliability and performance.
- Mass adoption means there is a lot of documentation out there and it is very easy to get help with trouble, you might run on it.
- It is one of the most feature rich web servers available.

DO SOMETHING GREAT
ABOUT
"India's Most Trusted Cinema Display Brand."
Arc (Ace Realm Carnival) is the market leader in terms of screen count in India. Since 1997, the brand has redefined the cinema industry and the way people watch movies in the country. The Company has, over the years, consistently added screens, both organically and inorganically.
We offer a diversified cinema viewing experience through our formats, including 'ARC Director's Cut', 'ARC LUXE', 'ARC IMAX', 'ARC Superplex' and pursuant to our acquisition and amalgamation of SPI Cinemas, 'Escape', 'Sathyam' and 'Palazzo'. The Company exhibits diversified content to serve different regional customer segments across India.
We have a diversified revenue stream and generate revenues primarily from box office and non-box office which primarily includes revenue from Sale of Food and Beverages, advertisement income, convenience fees, and income from movie production/ distribution among others.

            <div class="info">
                <div class="col50">
                    <h2 class="titleText">What Is Cinema ?</h2><br><br>
                    <p class="text">
                        Is it the same as a movie or film? Does it include digital video, broadcast content, streaming media? Is it a highbrow term reserved only for European and art house feature films? Or is it a catch-all for any time a series of still images run together to produce the illusion of movement, whether in a multi-plex theater or the 5-inch screen of a smart phone?<br><br>
                        Technically, the word itself derives from the ancient Greek, kinema, meaning movement. Historically, it’s a shortened version of the French cinematographe, an invention of two brothers, Auguste and Louis Lumiere, that combined kinema with another Greek root, graphien, meaning to write or record.<br><br>
```

The “recording of movement” seems as good a place as any to begin an exploration of the moving image. And cinema seems broad (or vague) enough to capture the essence of the form, whether we use it specifically in reference to that art house film, or to refer to the more commonplace production and consumption of movies, TV, streaming series, videos, interactive gaming, VR, AR or whatever new technology mediates our experience of the moving image. Because ultimately that’s what all of the above have in common: the moving image. Cinema, in that sense, stands at the intersection of art and technology like nothing else.As an art form it would not exist without the technology required to capture the moving image. But the mere ability to record a moving image would be meaningless without the art required to capture our imagination.

```
                </p>
            </div>
            <div class="col50">
                <div class="mediaimg">
                    <img src="img/s7.jpg">
                </div>
            </div>
        </div>
        <div class="info">
            <div class="col50">
                <div class="mediaimg">
                    <img src="img/s6.jpg">
```

```
        </div>
    </div>
    <div class="col50">
        <p class="text">But cinema is much more than the intersection of art and technology. It is also, and maybe more importantly, a powerful medium of communication. Like language itself, cinema is a surrounding and enveloping substance that carries with it what it means to be human in a specific time and place. That is to say, it mediates our experience of the world, helps us make sense of things, and in doing so, often helps shape the world itself. It's why we often find ourselves confronted by some extraordinary event and find the only way to describe it is: "It was like a movie."<br><br>
        In fact, for more than a century, filmmakers and audiences have collaborated on a massive, ongoing, largely unconscious social experiment: the development of a cinematic language, the fundamental and increasingly complex rules for how cinema communicates meaning. There is a syntax, a grammar, to cinema that has developed over time. And these rules, as with any language, are iterative, that is, they form and evolve through repetition, both within and between each generation. As children we are socialized into ways of seeing through children's programming, cartoons and YouTube videos. <br><br>
        As adults we become more sophisticated in our understanding of the rules, able to innovate, re-combine, become creative with the language. And every generation or so, we are confronted with great leaps forward in technology that re-orient and often advance our understanding of
```

how the language works. And therein lies the critical difference between cinematic language and every other means of communication. The innovations and complexity of modern written languages have taken more than 5,000 years to develop. Multiply that by at least 10 for spoken language.Cinematic language has taken just a little more than 100 years to come into its own.

            <div class="title">
                <h1 align="center">About</h1>
                <h3 align="center">"India's Most Trusted <br> Cinema
    Display <br> Brand."</h3>
            </div>
            <div class="text">
                <p>Arc (Ace Realm Carnival) is the market leader in terms of
screen count in India. Since 1997, the brand has redefined the cinema industry
and the way people watch movies in the country. The Company has, over the
years, consistently added screens, both organically and inorganically.</p>
```

We offer a diversified cinema viewing experience through our formats, including ‘ARC Director’s Cut’, ‘ARC LUXE’, ‘ARC IMAX’, ‘ARC Superplex’ and pursuant to our acquisition and amalgamation of SPI Cinemas, ‘Escape’, ‘Sathyam’ and ‘Palazzo’. The Company exhibits diversified content to serve different regional customer segments across India.

We have a diversified revenue stream and generate revenues primarily from box office and non-box office which primarily includes revenue from Sale of Food and Beverages, advertisement income, convenience fees, and income from movie production/ distribution among others.

Bibliography

The bibliography contains reference to all the Documents that were used to develop the web application.

Books:

- **PHP and MySQL web development (developer's libraby)**

  -by Luke Welling

- **Programming PHP (paperback)**

  -by Rasmus lerdorf

- **Javascript: The definitive guide**

  -by David Flanagan

Websites:

1. www.w3schools.com

2. www.pvrcinemas.com

Conclusion

It was a great learning experience for all of us. This website is very powerful us in our life. After this website, we are redy for doing any website in our field. Also we are very impress from Back-End and Front-End used in website. This website is very useful for growing our self in our life.

We are really thankful to our faculties and lab assistants first for giving us a chance to make a website, without wee are not able to make our website successfully.

We hare by conclude this report, which gives information reagarding the development and use of the application with an overview of different aspects of it. Thus at end of this we all would like to state this as fun with persistence and dedication.
